Engineering Circular No. 133

Subject: Directorate General of Shipping approved standard formats for Ozone Depleting Substances Record Book

1. Resolution MEPC 176(58) was adopted by IMO on 10th October, 2008 for the amendments to MARPOL 73/78, Annex-VI. As per revised MARPOL Annex-VI, Regulation 12, each ship subject to regulation 6.1, requires to maintain a list of equipment containing ozone depleting substances and ships which have rechargeable systems that contain ozone depleting substances shall maintain an Ozone Depleting Substances Record Book. This record book may form part of an existing log-book or electronic recording system as approved by the Administration.

2. Many ship owners/shipping companies are approaching the Directorate for approval of the said record book. In order to stream line the process, the Directorate has decided to place approved standard formats (i.e [Annex-1](#), [2](#) & [3](#) of this circular) in the DGS web-site. All ship owners/shipping companies are requested to down load the above mentioned formats and place the same onboard ships with immediate effect. The format is available on www.dgshipping.com – Shipping Notices/Engineering Branch/MARPOL 73/78.

This issues with the approval of the competent authority.
